INTERVIEW SUMMARY

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

This is to summarize the interview between Examiner Kambiz Zand and the undersigned Applicant's representative on September 15, 2006.

The Applicant argued that the identification memory card includes a plurality of contacts or pins, and that each interface available to different categories of recipients of information (medical, financial, etc.) has corresponding contacts forming a pin code that permits access only to certain compartments of the information stored within the identification memory card. The Examiner and Applicant's representative discussed support within the Specification for this limitation, including Paragraph 25 on Page 8, Paragraph 66 on Page 34, and Paragraph 84, Letter C on Page 40, as well as Fig. 1.

The Examiner suggested amending Claim 56 to include the limitations of Claim 57, and to make further amendments to Claim 56 to clarify that the pin code provides a hardware limitation on access to various compartments within the identification memory card. The Applicant agreed to this amendment.

Respectfully submitted,

William F. Lang IV
